September hath xix Days this Year.

1	f	Giles Abbot.	8	A	3	5	39	7
2	g	London burnt.	8		40	5	41	

According to an Act of Parliament passed in the 24th Year of his Majesty's Reign, and in the Year of our Lord 1751, the Old Style ceases here, and the New takes place; and consequently the next Day, which in the Old Account would have been called the 3d, is now to be called the 14th; the 11 intermediate nominal Days from the 2d to the 14th, being omitted, or rather annihilated, this Year; and the Month contains no more than 19 days, as the Title at the Head expresses.

1	4	A 37	12	fair and
2	5	38	3	pleasant.

N. B. From this Time all Days fix'd for the Payments of Rents, Annuities, &c. for the opening and shutting up of common Fields and Pastures: All Dates of Births, Deaths, &c. All fix'd Fairs and Marts, are by the said Act directed to be on the same natural Days, on which they would have happen'd, if this Act had not been made, viz. Eleven nominal Days later than the respective Days of the Month they would have happen'd on according to the Old Stile; for this Reason the 10th Day of O.S. is call'd *Old Michaelmas Day*, and so of the rest.

THE Table consists of five Columns. The first contains any Number of Years that are to be purchased, from 1 Year to 100.

The 2d tells you how many Years and odd Months Purchase such a Lease is worth in ready Money, 5l. per Cent. being allowed for the Interest of the Money laid out.

The 3d Column shews, what the same is worth at 6l. per Cent. The 4 at 8l. per Cent. and the last at 10l. per Cent.

Example: What is a Lease of 51 Years to come, worth in ready Money, at 5l. per Cent?

Look in the first Column for 51 Years, and right against it under 5l. per Cent. you shall find 18. 3. which shews the Lease is worth 18 Years Purchase, and 3 Months, which is a Quarter of a Year. So that if the Rent were 10l. a Year, then 18 Times 10l. is 180l. and the Quarter of the Year is 2l. 10s. in all 182l. 10s. and so much is the Lease worth in ready Money, at 5l. per Cent.-----But if the Purchaser would have 6l. 8l. or 10l. Profit for his Money, then let him look under the respective Columns of 6l. 8l. and 10l. per Cent. and he shall have his Desire.

A Table shewing the Price of the Great Hundred, or 112 lb. at any Price, from one Farthing the Pound to Eighteen Pence the Pound, and the contrary.
